Utility Mount
- Utility Mount
- 4x Screws (M2.5 x 8)
- 1x Screw (1/4"-20 x 3/8")
- Screwdriver
- Hex Key (Allen Key)
- HDMI   ConnecThor Cables

How to assemble:
Utility Mount

Remove the protective sticker from your Smart Controller to accesses the screw points

Align the mount with your Smart Controller to secure it in place with the (4x) screws provided .

To have better access of the rear screws adjust the angle of the top bracket

Now your utility mount is properly installed!

To install an HDMI Monitor, adjust the top bracket to have easy access to align it with the monitor's mounting point . With the screw provided and the use of the hex key (Allen key) secure it in place

Adjust the position of the monitor, accordingly , use the hex key to tighten it in place. You can use a small wrench tool #8 (not provided) to give it an extra tight.

Connect your monitor with the HDMI ConnecThor Cable included - to your DJI Smart Controller.

There you go,
now you are ready for takeoff.

How to assemble:

Tablet Mount

Align the mount with your Smart Controller to secure it in place with the (4x) screws provided .

Unscrew the tightening ring from the back of the

Tablet Clamp and place it on the ball joint

tightening
←ring

Attach the clamp to the ball joint and screw the ring back to secure the clamp position / angle.

← tightening ring

The clamp has two mechanisms to ensure your tablet sit secure and in place.

← Lock

The first mechanism is the ratchet part, to adjust to the size of your tablet. We recommend setting it a little smaller (1" / 2.5cm) than the actual size of the tablet for a tighter, secure fit.

⚠️ Once you have selected the right height lock the ratchet in place by sliding the lock downwards.

Place the tablet in landscape mode by pulling the spring mechanism upwards and release it to secure the tablet in place. You can adjust the top clamp tabs, if needed, to avoid pressing on any buttons
